DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: In line 5 of claim 15 after "and a" the word --given--has been inserted.

In line 8 of claim 15 after "substantially the" the word --given-- has been inserted.

In line 5 of claim 19 after "and a" the word --given--has been inserted.

In line 8 of claim 19 after "substantially the" the word --given-- has been inserted.

These amendments were made in order to place the case in condition for allowance. They were also based on the applicant's statement in the remarks filed 11/22/06 on page 11, lines 13-19 that independent claims 1, 10, 15, and 19 had been amended to overcome the 112 rejection. Claims 1 and 10 were so amended, but it appears that claims 15 and 19 were accidentally not amended in a similar manner.

Allowable Subject Matter

2. Claims 1, 3, 6-12, 14-15, 17-20, and 22-37 are allowed.
3. The following is an examiner's statement of reasons for allowance: Claims 1, 6, 15, 19-20, and 24-29 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 8 wherein the high speed flip flop comprises a high speed

latch (710) and a low speed latch (720) in combination with the rest of the limitations of the base claims and any intervening claims. Claims 3, 9, 17, and 22 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 8 wherein the circuit comprises an inductive load (L1, L2) for the first flip flop (710) in combination with the rest of the limitations of the base claims and any intervening claims. Claims 7, 18, and 23 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 8 wherein the first, second, and output signal comprise differential signals in combination with the rest of the limitations of the base claims and any intervening claims. Claims 8 and 30-31 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 8 wherein the high speed flip flop comprises a high speed latch (710) and a low speed latch (720) in combination with the rest of the limitations of the base claims and any intervening claims. Claims 10-12, 14, and 32-37 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 8 wherein the first, second, and output signal comprise differential signals in combination with the rest of the limitations of the base claims and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
